

puddles of Fun

A family activity.

Take this with you as you explore this place.

Remember it for family adventures everywhere.

THE NATIONAL TRUST

Puddles of Fun

Where should we go?

Anywhere you'll find some good puddles.

What will we need?

Welly boots and bundles of energy.

How long will it take?

Until you've splashed all the rain water out of your puddle!

What do we do?

- Find a good size puddle and splash with your toes to test how deep it is.
- Hunt for a selection of natural objects, such as leaves, twigs and pebbles, to see which will float on the surface and which will sink to the bottom. Which would make the best boat for a minibeast to cross your puddle?!

Can we take it home?

Leave behind the bits and bobs you collected for others to test when they go puddle hunting.

What can we do at home?

If there are lots of puddles in your garden, try to cross from one side to the other jumping from one puddle to the next. You might have to change the direction of your route as you go to make it all the way across.
