

MAKE YOUR OWN

ANIMAL MASK

Find out which animals will be affected by climate change and make your own mask to wear!

WATER VOLE

The water vole can't survive where there are flood and drought conditions. They need the water to be at a constant level.

MOUNTAIN HARE

Mountain hare's are affected by the warming of the mountain regions of the UK. Their coat turns white in winter and with no snow they are easily caught by predators.

SEAL

Seals will be affected as their food sources move away from their breeding grounds as the oceans warm up.

Activities are free of charge.

All children must be accompanied by an adult.
